INDEX TO VOL. IX (B)

AUTHORS' INDEX

Abdur Rashid Khan	..	*See* Ali Mohammad and Abdur Rashid Khan.
Abhyankar, V. S., Kotastane, W. V., and Narayana, N.		The proteins of Bajri (*Pennisetum typhoideum*), 126.
Aiyar, R. Gopala	..	On the nephridia of *Prionospio cirrifera* Wiren, 57.
		See Panikkar and Aiyar.
Ali Mohammad and Abdur Rashid Khan		Root development of certain oilseed crops of the Punjab, 247.
Ayyangar, G. N. Rangaswami, and Rajabhooshanam, D. S.		A preliminary analysis of panicle structure in sorghum—the great millet, 29.
Bal, D. V., and Misra, S. K.		A study of the effect of different types of rations on the quality of milk, milk yield and the general condition of milch buffaloes, 117.
Basheer, Mohamed	..	*See* Cherian and Basheer.
Cherian, M. C., and Basheer, Mohamed		*Tetrastichus sokolowskii* Kurdj (family Eulophidæ) a larval parasite of *Plutella maculipennis* in South India, 87.
Chiplonker, G. W.	..	Echinoids from the Bagh-beds—Part II, 236.
Gupta, S. N. Das, and Verma, G. S.		Studies in the diseases of *Mangifera indica* Linn. I. Preliminary observations on the necrosis of the mango fruit with special reference to the external symptoms of the disease, 13.
Jones, S.	..	On the external gills of *Acentrogobius viridipunctatus* (Day), 256.
Kausik, S. B.	..	A cytological study of *Scaevola Lobelia* Linn., 39.
Kotastane, W. V.	..	*See* Abhyankar and others.
Lal, K. N.	..	*See* Singh and others.
Lal, M. B.	..	*See* Singh and others.
Lal, Shyam Sunder	..	The internal ear of *Scoliodon sorrakowah* (Cuvier), 365.

Mehra, H. L. ..	*See* Mehra and Mehra.
Mehra, P. N., and Mehra, H. L.	Life-history of *Stephensoniella brevipedunculata* Kash., 287.
Mehta, M. L. ..	*See* Singh and Mehta.
Misra, K. C. ..	A contribution to the embryology of the Verbenaceæ, 49.
Misra, S. K. ..	*See* Bal and Misra.
Mundkur, B. B. ..	*See* Pal and Mundkur.
Nair, K. Bhaskaran ..	The reproduction, oogenesis and development of *Mesopodopsis orientalis* Tatt., 175.
Nair, K. M. ..	*See* Singh and others.
Narayana, N. ..	*See* Abhyankar and others.
Pal, B. P., and Mundkur B. B.	Studies in Indian cereal smuts—I. Cereal smuts and their control by the development of resistant varieties, 267.
Panikkar, N. Kesava, and Aiyar, R. Gopala	Observations on breeding in brackish-water animals of Madras, 343.
Parukutty, P. R. ..	On a collection of algæ from Assam, 229.
Puri, V. ..	Studies in the order Parietales, II. A contribution to the morphology of *Garcinia livingstonii* T. Anders, 74.
Rajabhooshanam, D. S. ..	*See* Ayyangar and Rajabhooshanam.
Rao, C. Suryaprakasa	The Myxophyceæ of the Bihar Province, India—I, 142.
Rao, H. S. ..	Cuticular studies of magnoliales, 99.
Rao, S. R. A. N. ..	*See* Singh and Rao.
Sahni, B. ..	The relation of the *Glossopteris* flora with the Gondwana glaciation, 1.
Seshachar, B. R. ..	On a new species of *Uraeotyphlus* from South India, 224.
Singh, B. N., Lal, K. N., and Lal, M. B.	The influence of artificial fertilisers upon the photosynthetic efficiency of *Andropogon Sorghum*, 151.
Singh, B. N., and Mehta, M. L.	Studies on physico-chemical relations of soil and water—I. Water retentive force of soil as influenced by chemical fertilisers, 133.
Singh, B. N., and Rao, S. R. A. N.	Photosynthetic efficiency of leaves as influenced by variations in pH of the injected solutions, 169.

Singh, B. N., and Singh, S. N. — Photoperiodism and the phasic development of *Crotalaria juncea*, 323.

Singh, B. N., Singh, S. N., and Nair, K. M. — The influence of mositure content and nitrate feeding on the nitrogen cycle in the soil both under aerobic and anaerobic conditions, 331.

Singh, Jagjiwan .. A contribution to our knowledge of the Indian soil actinomycetes, 69.

Singh, Rama Nagina .. The Myxophyceæ of the United Provinces, India—IV, 63.

Singh, S. N. .. *See* Singh and others.

See Singh and Singh.

Sood, Maheshwar Singh .. A peculiar case of caudal abnormality in *Hemidactylus flaviviridis* Rüppel, 316.

Subramaniam, M. K. .. Studies on the structure of the Golgi apparatus —V. The idiosome in the pancreas of the toad and its possible relation to the ergastoplasm, 271.

Verma, G. S. .. *See* Gupta and Verma.

Virkki, C. .. On the occurrence of similar spores in a lower Gondwana glacial tillite from Australia and in lower Gondwana shales in India, 7.

TITLE INDEX

Acentrogobius viridipunctatus (Day), On the external gills (Jones), 256.

Actinomycetes, of the Indian soil, a contribution to our knowledge (Singh), 69.

Algæ from Assam, on a collection (Parukutty), 229.

Brackish-water animals of Madras, observations on breeding (Panikkar and Aiyar,) 343.

Cereal smuts, Indian, Studies, I (Pal and Mundkur), 267.

Echinoids from the Bagh-beds, II (Chiplonker), 236.

Embryology of the Verbenaceæ, a contribution (Misra), 49.

Glossopteris flora, relation, with the Gondwana glaciation (Sahni), 1.

Golgi apparatus, studies on the structure, V (Subramaniam), 271.

Hemidactylus flaviviridis Rüppel, a peculiar case of caudal abnormality (Sood), 316.

Magnoliales, cuticular studies (Rao), 99.

Mangifera indica Linn., studies in the diseases, I (Gupta and Verma), 13.

Mesopodopsis orientalis Tatt., the reproduction, oogenesis and development (Nair), 175.

Milk, milk yield and the general condition of milch buffaloes, a study of the effect of different types of rations on the quality (Bal and Misra), 117.

Myxophyceæ of the Bihar Province, India—I (Rao), 142.

Myxophyceæ of the United Provinces, India—IV (Singh), 63.

Nephridia of *Prionospio cirrifera* Wiren (Aiyar), 57.

Nitrogen cycle in the soil, the influence of moisture content and nitrate feeding, both under aerobic and anaerobic conditions (Singh and others), 331.

Parietales, order, Studies, II (Puri), 74.

Photoperiodism and the phasic development of *Crotalaria juncea* (Singh and Singh), 323.

Photosynthetic efficiency of *Andropogon Sorghum*, the influence of artificial fertilisers (Singh and others), 151.

Photosynthetic efficiency of leaves as influenced by variations in pH of the injected solutions (Singh and Rao), 169.

Physico-chemical relations of soil and water—I (Singh and Mehta), 133.

Proteins of Bajri (*Pennisetum typhoideum*) (Abhyankar and others), 126.

Root development of certain oilseed crops of the Punjab (Ali Mohammad and Abdur Rashid Khan), 247.

Scaevola Lobelia Linn., a cytological study (Kausik), 39.

Scoliodon sorrakowah (Cuvier), the internal ear (Lal), 365.

Sorghum—the great millet, a Preliminary analysis of panicle structure (Ayyangar and Rajabhooshanam), 29.

Spores, similar, on the occurrence, in a lower Gondwana glacial tillite from Australia and in lower Gondwana shales, in India (Virkki), 7.

Stephensoniella brevipedunculata Kash., life-history (Mehra and Mehra), 287.

Tetrastichus sokolowskii Kurdj (Family Eulophidæ)—a larval parasite of *Plutella maculipennis* in South India (Cherian and Basheer), 87.

Uræotyphlus, a new species, from South India (Seshachar), 224.
